

THG Capital 9% Fixed Rate Bond

THG Capital is part of The Hinton Group, a company that started its life in 1999, then became recognised as the entity it is today in 2001. Therefore, we celebrated our 20th Anniversary in 2021 and wish to thank our clients all over the world for their custom, kind words and for trusting Hinton's with their savings for over twenty years.

THG Capital Fixed Rate 9% 12-month Bond

THG Capital offers access to both private and institutional savers looking for fixed rate returns and have a lower appetite for risk than some other investment products.

With minimum opening balances of £10,000 on the capital growth 1 year option and £30,000 on the quarterly income, THG Capital offers these products that satisfy both shorter term savers and those looking for bank beating rates.

To aid our international expat customers, we allow multiple currencies; Sterling, Euro and US Dollar.

THG Capital is able to offer the returns shown through the process of gold streaming. As the following illustration shows, gold streaming is a known process both logistically and financially, therefore, it is not associating itself with the risk commonly linked to the gold market.

The only caveat is that we advise all savers to stay in the Bond for the entirety of the term. The Bonds are available to open at any time throughout the year, but have June and December maturity dates. Those saving for longer than 12 months will indeed attract a higher return, based on the total time in the Bond. In essence, the Bond returns 0.75% per month (9% p.a.) If there have been any extra profits made on any of the trades, the Manager of the Bond can issue an extra coupon to increase the returns.

The ultimate aim is, therefore, to provide a transparent, secure and well-structured savings product for savers wishing to seek higher interest rates on their savings than in the banks, without taking the risks associated with the global stock markets.

“The ultimate aim is to provide a transparent, secure and well-structured product.”

24-Month Quarterly Income

7.5% p.a (1.875% pq)

The THG Capital Gold Bond
How you get the returns...

Gold streaming and how it works and mitigates risk

The Structure

- THG Capital Gold Bond owns the clients and the Assets Under Management Value (AUM)
- Bullion Bridge Limited in the UK, Africa and Dubai are the advisers, buyers and sellers used by THG Capital for gold trades
- UK FCA Registered Trustees collect and hold the money for THG Capital and release funds for approved trades advised by Bullion Bridge

The Process

This process typically happens over 30 days and throughout the terms of the Bond.

The risk is mitigated by the purchase and sales price being agreed prior to each transaction.

The sale of the end product minus the cost of purchase, the insurance, the shipping and the refining gives the growth.

The bond manager and the FCA Registered Trustees know their fees and are able to calculate the returns they can pay the Bond Holders.

The Bond

THG Capital has chosen Bullion Bridge as the Bond's Investment Operator (IO). Bullion Bridge have been partners with Hintons since inception and have a 100% track record of not only delivering the promised returns, but an 'excellent' rated customer service. We have been privileged to not only obtain new customers for them, but also have the enviable job of processing their maturities. Again, every client of Hintons has received 100% of the amount due, which has led to us being awarded a 4.7/5-star rating (correct at the time of printing).

Maturity

Upon maturity you have 4 options:

- Take the full amount payable
- Rollover the maturity into the next Bond
- Take the interest and rollover the capital into next bond
- Rollover the maturity proceeds and add more money

The THG Capital Gold Bond enable the client to

benefit from:

- Gross interest payments
- Fixed returns and terms
- No hidden fees or charges
- Globally available/portable product
- No set up or exit fees
- Various currencies
- UK FCA registered Trustees
- Quarterly income option

How to apply

THG Capital's savings products are available directly through our in-house brokerage:

mybestbuysavings.com, networks, brokers and financial advisers.

Please read the Term Sheet for more details.
